

# 6551 FORD SUPER-LITE STARTERS

**NEW!**

6551A

6551B

1.6KW gear reduction motor provides 30% more torque and allows for longer cranking time without overheating

Motor features a heavy duty armature supported on premium quality ball bearings and a steel housing for maximum strength

These starters are far lighter and smaller than OE starters weighing only 6.9 pounds and can be indexed for additional oil pan and header clearance

Fits the Ford 289, 302 and 351W engines with an automatic transmission and straight two bolt mounting

Available in two finishes:  
Chrome plated 6551A  
As Cast 6551B

Cranks up to 12:1 compression engines.

Built in USA from 100% new components.
