

POWER STEERING PUMPS FOR GM PICKUPS

NEW!

- GM Saginaw style pump features all new components including reservoir and pump assembly.
- Includes a billet chrome cap, dipstick and hardware. Pressure port is 5/8"-18 SAE inverted flare.
- Press fit shafts are 3/4" OD, include a pulley installation kit and require a press-fit pulley.
- 5/8" keyed shafts require a bolt-on pulley and include a 1/8" x 7/16" Woodruff key.
- Pumps are 1200 PSI/3GPM rated to work with most gearbox systems.
- 850 PSI/2 GPM pressure valve sold separately for Mustang II systems.
- Clockwise rotation only, pulley not included.
